

# ACES

## AUTOMATED COMMUNICATIONS ENGINEERING SOFTWARE

### REAL-TIME, TACTICAL NETWORK PLANNING SOFTWARE

Sypris Electronics has developed the Automated Communications Engineering Software (ACES), a network planning software program, for the U.S. Army. Ideal for the fast pace of today's battlefield environment, ACES runs on a ruggedized Windows XP/2000 COTS platform for tactical operations as well as on Windows XP/2000 desktop workstations in strategic locations.

## FEATURES & FUNCTIONS

- Frequency Assignment to Networks
- Signal Operating Instructions Generation and Distribution
- SINCGARS Loadset Planning/Generation/Distribution
- Crypto-Net/Equipment Planning and Distribution
- COMSEC Key assignments to Equipments
- Interface to Tier 3 Devices (i.e. RASKL)
- Data exchange with other systems (Spectrum XXI, CUAS, RBECS, ISYSCON)
