**FOR IMMEDIATE RELEASE**

**SYPRIS ELECTRONICS' TEMPEST TESTING LAB RECEIVES  
GOVERNMENT CERTIFICATION**

**TAMPA, FL. (April 13, 2009)** – Sypris Electronics, a subsidiary of Sypris Solutions, Inc., announced that it has been approved as a Certified TEMPEST Test Services Facility by the National Security Agency's (NSA) TEMPEST Certification Program, (TCP). Sypris Electronics is one of only ten companies in the United States and the second in the state of Florida to receive this stringent qualification by the NSA.

TEMPEST testing ensures products are created to reduce or eliminate the electromagnetic emissions that would otherwise be a security risk of sensitive information being unintentionally compromised. This critical test service is performed on ruggedized electronic equipment that is deployed to troops in the field, and suppressed commercial information processing equipment used in military and government installations.

The NSA manages two TEMPEST Certification Programs: the Products and Test Services Programs. Sypris Electronics has been recognized under the Certified TEMPEST Test Services Program. The NSA currently manages a list for use by U.S. Government departments and agencies, U.S. Government contractors, and eligible TEMPEST product manufacturers to conduct TEMPEST testing related to the development and production of TEMPEST products.

"TEMPEST testing is critical in protecting our troops and national security," stated John Walsh, President of Sypris Electronics. "This privileged and rigorous certification places Sypris Electronics in a unique class being able to help companies certify their ruggedized electronic products for use in a military environment. TEMPEST testing is a complementary capability to our portfolio of high assurance solutions offerings, specializing in cryptographic, electronic key management and cyber security products and services."

Sypris Electronics is a world-class, integrated systems solutions provider. Our ruggedized electronic products, advanced engineering services and complete electronic manufacturing capabilities are aligned to provide our customers the best people, practices and technologies to continually exceed expectations. We consistently promote an agile, innovative culture by strategically partnering with leading-edge technology companies, agencies and universities. With over 40 years of experience, Sypris Electronics is proud to develop, manufacture and integrate leading technologies into mission critical electronics systems that secure America's interest.
